

Сведения об официальном оппоненте

Макаров Александр Александрович, доктор биологических наук, специальность 03.01.03 – молекулярная биология, профессор, академик РАН, научный руководитель института, Федеральное государственное бюджетное учреждение науки Институт молекулярной биологии им. В. А. Энгельгардта РАН.

Список основных публикаций по теме диссертации за последние 5 лет:

1. Barykin EP, Garifulina AI, Tolstova AP, Anashkina AA, Adzhubei AA, Mezentsev YV, Shelukhina IV, Kozin SA, Tsetlin VI, Makarov AA. Tetrapeptide Ac-HAEE-NH₂ Protects α 4 β 2 nAChR from Inhibition by A β // *Int J Mol Sci.* – 2020. – V. 21. – N. 17. – P. 6272.
2. Radko SP, Khmeleva SA, Kaluzhny DN, Kechko OI, Kiseleva YY, Kozin SA, Mitkevich VA, Makarov AA. The English (H6R) Mutation of the Alzheimer's Disease Amyloid- β Peptide Modulates Its Zinc-Induced Aggregation // *Biomolecules.* – 2020. – V. 10. – N. 6. – P. 961.
3. Anashkina A., Poluektov Y., Dmitriev V., Kuznetsov E., Mitkevich V., Makarov A., Petrushanko I. A novel approach for predicting protein S-glutathionylation // *BMC Bioinformatics.* – 2020. – V. 21. – P. 282.
4. Mokrushina YA, Golovin AV, Smirnov IV, Chatziefthimiou SD, Stepanova AV, Bobik TV, Zalevsky AO, Zlobin AS, Konovalov KA, Terekhov SS, Stepanov AV, Pipiya SO, Shamborant OG, Round E, Belogurov AA Jr, Bourenkov G, Makarov AA, Wilmanns M, Xie J, Blackburn GM, Gabibov AG, Lerner RA. Multiscale computation delivers organophosphorus reactivity and stereoselectivity to immunoglobulin scavengers // *Proc Natl Acad Sci U S A.* – 2020. – V. 117. – N. 37. – P. 22841-22848.
5. Rodin S, Kozin SA, Kechko OI, Mitkevich VA, Makarov AA. Aberrant interactions between amyloid-beta and alpha5 laminins as possible driver of neuronal dysfunction in Alzheimer's disease // *Biochimie.* – 2020. – V. 174. –P. 44-48.
6. Shaposhnikov MV, Zemskaya NV, Koval LA, Minnikhanova NR, Kechko OI, Mitkevich VA, Makarov AA, Moskalev AA. Amyloid- β peptides slightly affect lifespan or antimicrobial peptide gene expression in *Drosophila melanogaster* // *BMC Genet.* – 2020. – V. 21. – S. 1. – P. 65.
7. Zelenikhin PV, Ead Mohamed IS, Nadyrova AI, Sirotkina AA, Ulyanova VV, Mironova NL, Mitkevich VA, Makarov AA, Zenkova MA, Ilinskaya ON. *Bacillus pumilus* Ribonuclease Inhibits Migration of Human Duodenum Adenocarcinoma HuTu 80 Cells // *Mol Biol (Mosk).* – 2020. – V. 54. – N. 1. –P. 146-152.

8. Poluektov YM, Dergousova EA, Lopina OD, Mitkevich VA, Makarov AA, Petrushanko IY. Na,K-ATPase α -subunit conformation determines glutathionylation efficiency // *Biochem Biophys Res Commun.* – 2019. – V. 510. – N. 1. – P. 86-90.
