

Сведения об официальном оппоненте

Аутеншлюс Александр Исаевич, доктор биологических наук, специальность 14.03.09 – клиническая иммунология, аллергология, профессор, главный научный сотрудник Научно-исследовательского института молекулярной биологии и биофизики Федерального государственного бюджетного научного учреждения «Федеральный исследовательский центр фундаментальной и трансляционной медицины» (ФИЦ ФТМ).

Список основных публикаций по теме диссертации за последние 5 лет:

1. Arkhipov S.A., Studenikina A.A., Arkhipova V. V., Proskura A. V., **Autenshlyus A.I.** Markers of Proliferation and Epithelial-Mesenchymal Transition and Their Association with Histidine-Rich Glycoprotein HRG mRNA Expression in Breast Diseases // Cell tissue biol. Pleiades Publishing, – 2025. – Vol. 19. – № 1. – P. 55–59.
2. Studenikina A.A., Ryzhikova S.L., Proskura A. V., **Autenshlyus A.I.** The effect of carcinoembryonic antigen on cytokine production in breast cancer patients // Med. Counс. – 2025. – № 10. – P. 128–135.
3. Arkhipov S.A., Mangazeeva E.D., Arkhipova V. V, Bogachuk A.P., Lipkin V.M., **Autenshlyus A.I.** The effect of the acetyl-amide form of the synthetic peptide HLDF-6 on the CDH2 and CD24 expression in breast cancer // Sib. Nauchnyj Med. Zhurnal. – 2025. – Vol. 45. – № 3. – P. 97–103.
4. Mangazeeva E.D., Studenikina A.A., Mikhailova E.S., Morozov D. V., Ryzhikova S.L., Druzhinina Y.G., Proskura A. V., Bogachuk A.P., Lipkin V.M., **Autenshlyus A.I.** Cytokine production by the biotates of invasive non-specific breast carcinoma as a criterion for the use of acetylamide form of synthetic HLDF-6 peptide for differentiation therapy of breast cancer // Med. Immunol. Russian Association of Allergologists and Clinical Immunologists, St. Petersburg Regional Branch (SPb RAACI), – 2025. – Vol. 27. – № 4. – P. 739–748.
5. Studenikina A.A., Proskura A. V., **Autenshlyus A.I.** Nottingham Prognostic Index relation to cytokine-producing tumor molecular subtypes in breast cancer // Profil. Meditsina. – 2025. – Vol. 27. – № 1. – P. 63–68.
6. Arkhipov S.A., Arkhipova V. V., Proskura A. V., Mangazeeva E.D., **Autenshlyus A.I.** Prognostic significance of molecular markers in assessing the risk of cancer development in patients with non-malignant breast diseases // Profil. Meditsina. – 2025. – Vol. 28. – № 1. – P. 69–75.

7. Mangazeeva E.D., Studenikina A.A., Ryzhikova S.L., **Autenshlyus A.I.** Association of tumor cell differentiation with cytokine-producing reserve in luminal and nonluminal subtypes of breast cancer // *Med. Immunol.* – 2025. – Vol. 27. – № 1. – P. 97–106.
8. **Autenshlyus A.**, Arkhipov S., Mikhaylova E., Arkhipova V., Proskura A., Varaksin N., Lyahovich V. Epithelial – mesenchymal transition markers, proliferation markers, and cytokine secretion in breast tissue in malignant and benign breast diseases // *Bull. Sib. Med.* – 2024. – Vol. 22. – № 4. – P. 6–14.
9. **Autenshlyus A.I.**, Arkhipov S.A., Mikhaylova E.S., Arkhipova V. V., Varaksin N.A. Relationship between the cytokine profile of supernatants of invasive breast carcinoma and its molecular and histopathological characteristics // *Sib. J. Oncol.* – 2024. – Vol. 22. – № 6. – P. 92–102.
10. Studenikina A.A., Perepechaeva M.L., Mikhaylova E.S., Varaksin N.A., **Autenshlyus A.I.** Cytokine production by blood cells and tumor samples and its coupling to microRNA expression in breast cancer patients // *Med. Immunol.* – 2023. – Vol. 25. – № 6. – P. 1407–1416.
11. Studenikina A.A., Mikhaylova E.S., Arkhipov S.A., Varaksin N.A., Proskura A. V., **Autenshlyus A.I.** Blood biomarkers and Ki-67 proliferation marker in breast cancer // *Med. Immunol.* – 2023. – Vol. 25. – № 2. – P. 357–366.
