

International Workshop “Targeting RNA world”

Dear colleagues!

Scientists of the Institute of Chemical Biology and Fundamental Medicine SB RAS cordially invites you to attend **International Workshop “Targeting RNA world”** in the frame of the project of Russian Scientific Foundation “New generation of RNA-targeting oligonucleotide derivatives as a platform for designing innovative therapeutics” (no. 14-44-00068). Workshop is being held in Park Inn by Radisson Pulkovskaya Hotel & Conference Centre St Petersburg, Saint-Petersburg, Russia, **September 2-7 2018**.

We will discuss all aspects of RNA targeting with the purpose of target validation, oligonucleotide modification, functionalization and delivery, molecular modeling of RNA/oligonucleotide and RNA/protein complexes, development of RNA-targeting drugs and translational studies.

The cost of participation in the Workshop includes the fare and accommodation in Park Inn by Radisson Pulkovskaya Hotel & Conference Centre St Petersburg (Pobedy Square, 1 196240, Saint-Petersburg, Russia). Accommodation fee is US\$ 80 for single room and US\$ 95 for double room. Registration fee and meals will be paid by the Organizing Committee.

The Workshop participants have the opportunity to publish their results in special issue of in a peer-reviewed journal cited in Web of Sciences and Scopus entitled “Targeting RNA world”. Executive editor of special issue is Prof. Olga Ilinskaya from Kazan University (Russia). The title of the Journal and information on the timing of submission of articles will be presented in the next Announcement.

We encourage you to submit the title of your talk and confirmation of your participation in Workshop before June 26th 2018 to Organizing Committee. Applicants who confirmed their participation in the Workshop can submit the title and abstract of manuscript before July 3rd 2018 to Organizing Committee to consider the possibility of publishing in special issue “Targeting RNA world”.

We hope you will attend our International Workshop and find time to sample many of the unique features within the city of Saint-Petersburg.

Chairman of the Organizing Committee

Nadezhda Mironova
